### **AUDITOR'S OFFICE LAUNCHES NEW FEATURE ON WEBSITE THAT OFFERS USER-FRIENDLY SNAPSHOT OF TAX PROPERTIES**

A new feature on the Medina County Auditor's website was launched today that offers users a robust snap-shot of tax parcel information, including aerial images, appraised land value, measuring tools and tax payment status.

Known as Parcel Viewer, the feature has been in development for several months and is now available for supporting agencies, organizations and the public to locate an area of interest and review common information typically stored in a local government computer-aided mass appraisal (CAMA) and tax receivables database.

"We're very excited to offer this new feature to Medina County residents," said Auditor Mike Kovack. "We are constantly researching the latest options to bring the wealth of information we maintain to our users and we believe this will be an option that will be extremely helpful to Medina County property owners going forward."

The feature can be found on the Auditor's website at: [www.medinacountyauditor.org](http://www.medinacountyauditor.org) under the Real Estate menu – Parcel Viewer is the second option from the top. To get started, search for a parcel number, address or owner to discover parcel and tax information. If you need help navigating this application, please use the User Guide button located at the top right.

"The Parcel Viewer presents a modernized application that keeps us on the cutting edge of geographical imaging systems (GIS) among assessor offices across the country," said Zach Alexander, GIS analyst at Medina County Auditor's Office who helped design this new feature. "Every step of the design process attempted to ensure that the Parcel Viewer experience would be streamlined and intuitive. This is just the beginning, though – we will be adding numerous features in the future to ensure that we are providing the best user experience that we can."

Please contact the Auditor's Office with any questions or comments about Parcel Viewer at 330-725-9247.
